HACKATHON PROJECTS

Build your own portfolio

1. Choose a platform to host your portfolio (such as Github Pages, Heroku, or Netlify)
2. Gather at least 5 samples of your work (can be professional, personal, or freelance projects)
3. Design and develop your portfolio using HTML, CSS, and JavaScript
4. Submit your portfolio on the hackathon platform for judging and feedback from the judges.

Build an video application using AgoraJS

1. Use AgoraJS SDK to build a video chat or conferencing app
2. Implement interactive features such as chat, screen sharing, or virtual backgrounds
3. Host the application on a platform such as Heroku or Netlify
4. Submit your application along with the Agora AppID on the hackathon platform for judging and feedback from the judges.

Final step

1. Create a GitHub repository for your project
2. Push your project files to the repository using Git commands
3. Share the repository link on the hackathon platform for judging and feedback from the judges.

Clone a Social media

1. Choose a social media platform to clone (such as Facebook, Twitter, or Instagram)
2. Design and develop the platform using HTML, CSS, and JavaScript
3. Host the platform on a platform such as Heroku or Netlify and submit the URL on the hackathon platform for judging and feedback from the judges.
